

## Switching the heating ON/OFF

	<p><b>Caution!</b></p> <p><b>Danger of burns</b></p> <p>→ Position the device at least 2m away from people and heat sensitive objects to avoid burns or damage.</p>
-----------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------

You can switch the heating function of the device ON and OFF and set the heat level using slider 1.

- Move slider 1 to the left to adjust the heating to a low level.
  - The heater is now switched to a low level.
  - The single red LED lights up.
- Move slider 1 to the right to switch the heating to a higher level.
  - The heater is now switched on to the higher level.
  - The double red LEDs light up.
- Move slider 1 to the middle to turn the heating OFF.
  - The heater is now switched off.
  - No red LEDs light up.
