

# iiRDS Sample Content

© 2019 tekom e.V.

Dr. Martin Kreutzer (Empolis Information Management GmbH)  
Mark Schubert (parson AG)

## Overview

This document describes the iiRDS Sample Content.

The iiRDS Sample Content intends to make it easier for interested parties to get started with iiRDS. Based on a simple technical documentation, the sample content illustrates for developers and consultants how to use iiRDS.

The iiRDS Sample Content and this document are not normative and are not part of the iiRDS standard.

## PI-Fan as Technical Documentation Sample

PI-Fan 1.1 in English language serves as an example of technical documentation. The PI-Fan files are available here: <https://www.i4icm.de/en/research-transfer/pi-classification/pi-fan/>. The PI-Fan files are freely available under the MIT license. For details on copyright and licensing, see: <https://www.i4icm.de/fileadmin/content/Steinbeis/PI-Class/Downloads/Copyright.txt>. The license must be considered for further use of the iiRDS Sample Content Packages.

PI-Fan documentation is available in several variants. For the iiRDS Sample Content, the product variant X5-DH2 with all document types was used.

The introductory topics of each chapter from PI-Fan are not included, because they only contain the chapter headings.

Metadata in the iiRDS Sample Content is based on the PI classification of the PI-Fan data. In iiRDS, the PI classification is represented by multiple classes. In particular, the I-classification is split into product lifecycle phase, document type, and information subject in iiRDS.

## iiRDS Sample Content Packages

Based on the PI-Fan 1.1 in English, two iiRDS Sample Content Packages with iiRDS XHTML5 content files are available. iiRDS XHTML5 does not contain Javascript. To improve readability, a basic CSS file is provided with the iiRDS Sample Content Packages.

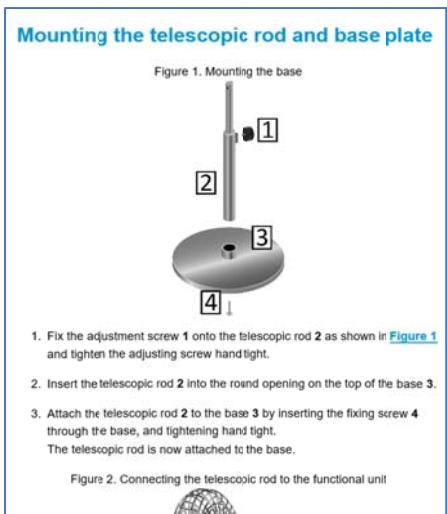

Figure1: Screenshot of 3\_2\_telescopic\_rod\_and\_base\_plate\_mounting.xhtml in iirds-sample-1\content\3\_Assembly

The iiRDS Sample Content Package contains the following two iiRDS Sample Content Packages:

- iirds-sample-1.iirds  
An *iiRDS/A* package, containing all topics of PI-Fan for the X5-DH2 product variant in iiRDS XHTML5 format. In addition, some are available as PDF/A files. It also contains a directory structure for navigation. Furthermore, a document without a rendition is included and linked to the root of the directory to model document metadata.
- iirds-sample-2.iirds  
An *iiRDS/A* package, containing a collection of topics relevant for operation of the product. It contains no navigation and no document. The independent topics are reused from iirds-sample1.iird package and have no document context.

## Metadata Vocabulary

The iiRDS Sample Content Packages use the iiRDS vocabularies where applicable, for example product life cycle phases, document types, topic types, and information subjects. In addition, the iiRDS packages contain administrative metadata, such as creation date and content lifecycle status.

The iiRDS Sample Content Packages also contains PI-fan-specific extensions of the iiRDS vocabulary. For example, *ProductVariant* and *Component* use a specific vocabulary which is defined within the iiRDS Sample Content Package.

```
<iirds:Component rdf:about="https://www.i4icm.de/pifan#TemperatureControl">
    <rdfs:label xml:lang="en">Temperature control</rdfs:label>
</iirds:Component>
```

For readability, labels have been added for these concepts, but they would not be mandatory for compliance with iiRDS.

## iirds-sample-1.iirds

The following compilation shows which *InformationUnits* with which metadata are available in the iiRDS Sample Content Package. There is one section for each information unit. The *InformationUnits* are listed in reading order. The first *InformationUnit* represents the iiRDS Sample Content Package itself.

## iirds-sample-2.iirds

The following compilation shows which *InformationUnits* with which metadata are available in the iiRDS Sample Content Package. There is one section for each information unit. The *InformationUnits* are listed unordered. The first *InformationUnit* represents the iiRDS Sample Content Package itself.
